

LASER HAIR REMOVAL

BENEFITS OF THIS TREATMENT

This is a permanent treatment that can help reduce hair on the face and body. Laser Hair Removal is a fast, comfortable, and effective treatment. No downtime is required.

SPECIAL INFORMATION ABOUT THIS TREATMENT

Laser Hair Removal requires approximately 6 treatments, 6–8 weeks apart to see maximum results. Optimal results are seen 1 year after your first treatment due to the natural cycles of hair growth. During the consultation your provider will discuss your personalized treatment plan. Maintenance will be required for most patients.

PRIOR TO TREATMENT

- Shave area to be treated the night beforehand. No waxing or plucking 4 weeks prior to appointment. No sun bathing before treatment; test spot may be required if there is any increased pigmentation from the sun.

POST-TREATMENT CARE

- Sun protection with SPF 30+ recommended. If there are any questions please call the office.

CONTRAINDICATIONS

- You are not a candidate if you are pregnant, breast feeding, recently on antibiotics, or have been on Accutane in the last 12 months. Not all hair types can be treated and this will be determined by the provider.
