

PRP (PLATELET RICH PLASMA)

BENEFITS OF THIS TREATMENT

This treatment that can help with hair restoration, and skin rejuvenation if paired with microneedling using your body's own growth factor. PRP is a fast, comfortable, and effective treatment indicated for hair loss. Minimal downtime is required.

SPECIAL INFORMATION ABOUT THIS TREATMENT

PRP requires 6–7 treatments, 4 weeks apart to see maximum results. Improvements will be noticeable after 1 month, but optimal results are seen 6 months after your first treatment. During the consultation your provider will discuss your personalized treatment plan. Numbing is required if paired with microneedling.

PRIOR TO TREATMENT

- Eat before your appointment and drink PLENTY of water before and after treatment.

POST-TREATMENT CARE

- If there is any discomfort Tylenol may be taken. After treatment daily activities can be resumed.

CONTRAINDICATIONS

- No contraindications for hair restoration procedure.
