

BENEFITS OF THIS TREATMENT

This treatment can help with the appearance of varicose and spider veins on the legs and arms. Sclerotherapy is a fast, comfortable, and effective treatment. No downtime is required.

SPECIAL INFORMATION ABOUT THIS TREATMENT

Sclerotherapy requires 1–3 treatments. Improvements will be noticeable immediately and will continue to improve over 2 months. During the consultation your provider will discuss your personalized treatment plan.

PRIOR TO TREATMENT

- Bring gradual compression stockings, if already purchased. They are available to purchase and there are specific requirements for optimal results.

POST-TREATMENT CARE

- Stockings must be worn for 3 days and walking is recommended. Daily activities should be resumed and prolonged bed rest is not allowed due to the risk of blood clots forming. Skin lightening creams may be required if pigmentation is increased in treated areas.

CONTRAINDICATIONS

- You are not a candidate if you are pregnant or breast feeding. Any other health related contraindications will be discussed with your provider.
